

clickGO™

 140

The G140 Series has a built-in automatic 'air pressured' disconnect mechanism. This mechanism automatically disconnects the plug when the air is inserted in the socket. This series is mainly used in automated production lines for gas charging and vacuum applications.

EQUIPPED WITH A SHUT-OFF VALVE

MAIN FEATURES

- Equipped with a shut-off valve to prevent gas (fluid) from flowing out.
- Built-in 'air pressured' disconnect mechanism.
- Manual disconnection possible in emergencies.
- Helps reduce operator fatigue and cycle time.

PART #	G140 AC0635	G140 AC0952
Description	Automatic Coupling	
Size (Inches)	1/4"	3/8"
Work Pressure	42 Kg / cm ²	
Max. Pressure	70 Kg / cm ²	
Types of Fluid	R134a, R22, R407, R410a etc.	
Materials Choices	SUS, Alu, Brass, Steel Alloys	
Seal Materials	HNBR, FKM, NBR, CR
